### ABOUT ME

I'm very proactive person, a learning passionate and become both a better person and professional. I always be very curious and I love to investigate about my favorite themes.

I'm very empathic and a team player, I think lean and support on out peers is the best way to improve our effort and get the best results.

I love challenges, and work on big and ambitious projects, I bring out my best when I face to face a problem and I'm very fast and effective solving them.

## EXPERIENCES

### Junior front-end developer

Roams - Since October 2023 - Full-time - Palencia - Spain

- Maintain and develop web functionalities in a big Angular 14 and Laravel project
- Implementation and design focused on UI/UX
- AMP driven development, improving the page speed
- Work on a big team and project planning

### WordPress developer

Arrow Design - March 2022 to June 2022 - Internship - Dublin - Ireland

- WordPress plugins and templates development and maintaining
- Work on English getting a high level
- HTML 5, CSS 3, JavaScript and PHP development
- Development of end-customer focused functionalities

### RetroAssistant

Final degree project - January 2022 to June 2022

It was my final degree project to end my studies, I developed a system who can monitor the most practical data of your old vehicle, as well this software can show you this data in real time on your smartphone and it can show you data plots of your vehicle. Also I developed the web store to this product, getting the best mark of my promotion.

### League of Legends Match Summary (Hackaton made by my current company)

Hackaton - February 2022

- Get data from and external API using Angular 12
- Design a really minimal, but useful user interface using bootstrap
- Top of class project
- Analyze and understand the client requirements
- Work with dead lines

## EDUCATION

### High technician on web application development

C.I.F.P. CAMINO DE LA MIRANDA

September 2021 to June 2022

I got knowledge of all the areas of development with great teachers, learning from the design and planing of a project to the web deployment. And obviously programming with lots of languages like Java, JavaScript, PHP, SQL, Angular ....

### Science leaving Certificate

I.E.S. VIRGEN DE LA CALLE

June 2019 to September 2020

In Spain this years is a training for the university but I refocus it to improve my abilities to resolve problems and myself, as well I reinforce my soft skills like my learning flow and think out the box.
